SKILLS

- **Languages:** Python, Java, C, C++
- **Frameworks:** HTML and CSS, Pandas, NumPy, Matplotlib, TensorFlow, Scikit-learn
- **Tools/Platforms:** Power BI (Dashboard Design, DAX), Tableau, Excel, MySQL, Oracle DB, Jupyter Notebook
- **ML & Analytics:** Predictive Analysis, Model Training, Data Preprocessing, Feature Engineering, Data Visualization
- **Soft Skills:** Analytical Thinking, Problem-Solving, Data Interpretation, Adaptability

PROJECTS

- **Photography Assistant Bot (Software) | Python, OpenCV, MediaPipe | [GitHub](#)** Jan'25 - Apr' 25
 - Developed a smart photography assistant that helps users capture better images through real-time detection, tracking, framing suggestions, and automated capture logic.
 - Implemented face/pose detection using OpenCV & MediaPipe; built a clean UI with Tkinter and added gesture capture, composition rules, and automated framing logic.
 - Delivered a user-friendly tool that improves image quality and reduces manual adjustments during photography.
- **Black Money Analytics Dashboard | Python, Pandas, Seaborn | [GitHub](#)** Jan'25 - Mar' 25
 - Analyzed 10,000+ suspicious financial activity to detect laundering patterns using structured transaction data.
 - Performed data cleaning, EDA, trend analysis, and risk scoring using Pandas; visualized insights with Seaborn & Matplotlib (distributions, heatmaps, category-wise breakdowns).
 - Created a visual dashboard highlighting anomalies, high-risk transactions, and laundering indicators for investigative insights.
- **Fire-Fighting Robot | Arduino, Flame Sensors, Motors, Pumps | [GitHub](#)** Sep'23 - Dec' 23
 - Created an autonomous robot capable of detecting and extinguishing small fire sources.
 - Programmed flame sensors, temperature sensors, and motor drivers using Arduino, implemented navigation, obstacle avoidance, and automated extinguisher control.
 - Built a functioning prototype that detects fire, moves toward it, and activates extinguishing mechanisms reliably.

TRAINING

- **Walmart Sales & Billing Dashboard | Lovely Professional University** May'25 - Jul'25
 - *Data Science using Excel*
 - Analyzed Walmart USA sales and billing data and developed a multi-sheet Excel dashboard with key KPIs such as Total Sales, Profit, Quantity Sold, and Order Count.
 - Created dynamic Pivot Tables, Pivot Charts, and slicers to explore trends across months, payment modes, product categories, and city-wise profitability.
 - Delivered an interactive dashboard that enhanced data interpretation and provided quick insights into revenue drivers and high-performing regions.

CERTIFICATES

- Generative AI for Data Analytics | Udemy | [Certificate](#) Sep' 25
- Computational Theory | Infosys | [Certificate](#) Aug' 25
- Cloud Computing | NPTEL | [Certificate](#) Apr' 25
- Python for Data Science | Board Infinity | [Certificate](#) Feb' 24

ACHIEVEMENTS

- **Working as Head of Media department for Department of Student Organization:** Jan' 24 - Jan'26
Successfully coordinated and supported 200+ institutional events through structured media planning
- **Secured Patent rights for my project** Apr' 25
Secured a patent for an innovative project and filed an intellectual property right for a Photography Assistant Bot

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.3 August 2023 - present
- **Aditya Junior College** Kakinada, Andhra Pradesh
Intermediate; Percentage: 85% April 2021 - March 2023
- **Subha Niketan School** Kakinada, Andhra Pradesh
Matriculation; Percentage: 80% June 2020 - May 2021
